

Food and Climate Change

FREE ENTRY

We vary in our feelings about climate change, but there is no longer any doubt that humanity needs to do something about it, and soon! As individuals we often feel helpless, but there is something we can all do. We will look at the part our food plays in generating greenhouse gas emissions, and identify how, by our choices and actions, we can start reducing this. We also might try a little future food!

A talk by Dr Althea Wilkinson
Althea is a member of Transition Wilmslow, part of the worldwide Transition movement.

When & Where

**Tuesday 13th
June 6.30pm
Bollington Cross
School Hall**

Bollington
